The Top 5 Ways to Protect Your Home in 2012

1. Keep up the exterior of your home. Cut the grass, take papers inside and fix fences. This will go a long way to **keep the value of your home** and protect it from appearing unoccupied. It may also prevent fire from spreading quickly and/or water from damaging more than necessary in the event of a flood.
2. Keep home insurance up-to-date. This is better than making repairs and replacing items without being covered by insurance. Contact one of our insurance partners to help determine the best policy. In the event of a disaster **we work directly with your insurance carrier** so you don't have to.
3. Keep the Air Clean: Install a carbon monoxide alarm, don't allow smoking indoors and test for radon which is the **leading cause of cancer** in non-smokers.
4. Fix leaks and prevent them. Check roof, foundation or crawlspace once a year to catch leaks or moisture problems and route water away from your home's foundation.
5. **Reduce your risk of fire**. Install fire extinguishers, inspect electrical cords for damage. Have gas furnaces and heat pumps serviced every two years. Test smoke alarms regularly to ensure they're working properly — and make sure to change the batteries at least once a year.

Top 10 2012 Resolutions from Life Coach Gary Blair

1. Save Money and Pay Off Loans
2. Lose Weight
3. Workout Regularly
4. Stay Happy
5. Plan Everything
6. Find Your Passion
